FEDERAL BUREAU OF INVESTIGATION

Date of transcription 09/15/2003

On September 10, 2003, [redacted]
date of birth: [redacted] social security account number [redacted]
[redacted] address: [redacted] MD [redacted] phone [redacted]
number: [redacted] was interviewed by Special Agent [redacted]
[redacted] FBI and [redacted] United States Postal Inspector at
[redacted] workplace, USAMRIID at Fort Detrick, Maryland. After being
advised of the identity of the interviewing agents and the purpose
of the interview, [redacted] provided the following information:

b6
b7C

[redacted] at the United States Army
Research Institute of Infectious Diseases (USAMRIID), Fort Detrick,
Maryland. [redacted] current supervisor is [redacted]
[redacted] degree in [redacted] from [redacted]

b6
b7C

[redacted] worked at [redacted]
prior to [redacted] employment at USAMRIID.

b6
b7C

[redacted] works primarily [redacted] approximately
[redacted] [redacted] has been employed at USAMRIID for [redacted]
[redacted]

b6
b7C

[redacted] has had hot side lab access in the past, [redacted]

[redacted] has worked with strains of Ames and Stearn Bacillus
anthracis (Ba) [redacted] The Ames strain was provided
by BRUCE IVINS.

b6
b7C

When [redacted] left USAMRIID, [redacted]
[redacted]

b6
b7C

[redacted] There are two autoclaves in [redacted]
larger autoclaves in the hallway between rooms [redacted] and
also two large autoclaves in the basement of [redacted] Animal [redacted]

b7E
b6
b7C

Investigation on 9/10/03 [redacted] Frederick, Maryland

File # 279A-WF-222936-POI 279A-BA-C101392-VAS Date dictated 9/15/03

by SA [redacted] Postal Inspector

File: [redacted] .wpd

279A-WF-222936-POI 279A-BA-C101392

Continuation of FD-302 of [REDACTED]

, On 9/10/03 , Page 2

b6
b7C

caretakers will sometimes autoclave in the basement. Samples are sometimes autoclaved twice.

[REDACTED] worked primarily in rooms [REDACTED] of building [REDACTED]. On occasion [REDACTED] would assist with challenges in [REDACTED]. Attached hereto and considered part of this document is a floor-plan with [REDACTED] initials.

b6
b7C

[REDACTED] has streaked agar plates following Ba challenges. The plates were stored in refrigerators in [REDACTED]. Anyone with access to any of these areas could take a streaked plate.

b6
b7C

[REDACTED] does not know anyone with particular expertise in weaponization techniques, spore production, or lyophilizing. [REDACTED] has no knowledge of anyone ever lyophilizing Ba.

b6
b7C

[REDACTED] has used the walk-in cooler of room [REDACTED] as does "everyone".

[REDACTED] has not observed anyone "piggy-back" in and out of hot areas nor does [REDACTED] do it. Removing any biological agent would not be difficult and could be done by simply walking it out of the building under one's clothing.

b6
b7C

[REDACTED] does not recall anyone with access and ability to create or handle dangerous biological agents having hostile attitudes toward any political organization, the media, or others.

b6
b7C

[REDACTED] does not believe anyone in particular could be responsible for the mailings.

b6
b7C

[REDACTED] has discussed with supervisor and co-worker [REDACTED] about the poor lab practices of [REDACTED].

b6
b7C

To prepare dried Ba for mailing, [REDACTED] described that one would grow-up the Ba, spin it, lyophilize it, and mill it down.

b6
b7C

[REDACTED] has not used sterilite containers nor does [REDACTED] know where any might be stored.

b6
b7C

[REDACTED] has never purchased franked envelopes.

279A-WF-222936-POI 279A-BA-C101392

Continuation of FD-302 of [REDACTED]

, On 9/10/03

, Page 3

The virology labs are decontaminated routinely with paraformaldehyde.

[REDACTED] witnessed the visitations of several [REDACTED] scientists on the hot sides of the labs. [REDACTED] does not know specifically who the visitors were or where they were from.

[REDACTED] did not personally handle any of the anthrax-laced letters or envelopes nor did [REDACTED] do any analytical work on the evidence in this case. [REDACTED] believed the anthrax-laced letters were examined in lab [REDACTED]

[REDACTED] has worked with [REDACTED] in the past. [REDACTED] would often participate in [REDACTED] challenges with [REDACTED] on the [REDACTED]

[REDACTED] told [REDACTED] that [REDACTED] helped [REDACTED] as per permission from the base commander.

[REDACTED] had never seen [REDACTED]

[REDACTED] has only seen [REDACTED] once since [REDACTED] left USAMRIID.

b6
b7C

279A-WF-222936-POI 279A-BA-C101392

Continuation of FD-302 of [redacted], On 9/10/03, Page 4

[redacted] understands that [redacted] is a [redacted] who
[redacted]

[redacted] knew [redacted] were "buddys", but
does not know anymore about that relationship.

[redacted] knew [redacted] to socialize often with [redacted] and
[redacted]

[redacted] thought [redacted] to be [redacted] and never knew
[redacted] to [redacted]

[redacted] believes [redacted]
[redacted]

[redacted] believes the anthrax mailings are a result of a
foreign "Islamic" terrorist movement, not domestic.

Title: AMERITHRAX;
MAJOR CASE 184

Synopsis: Report results of investigation regarding [REDACTED]
[REDACTED]

Details: [REDACTED] date of birth [REDACTED] Social
Security Account Number [REDACTED] formerly worked at [REDACTED]
[REDACTED]. In
this position [REDACTED] worked on a project at the United States
Army Medical Research Institute of Infectious Diseases (USAMRIID)
where [REDACTED] had access to *Bacillus anthracis* (B.a.) Ames strain.
[REDACTED] also has knowledge and expertise related to B.a.

As part of [REDACTED] worked at the
United States Army Medical Research Institute of Infectious
Diseases (USAMRIID) under [REDACTED]
[REDACTED] funding. [REDACTED] research at USAMRIID involved
the development of [REDACTED]

[REDACTED] containment facilities in Building [REDACTED] at
USAMRIID were used by [REDACTED]
[REDACTED] Bacterial spores, specifically B.a. Ames spores,
[REDACTED]

the presence of B.a. spores. Additional studies were conducted to
determine how [REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 01/05/2003

[redacted] advised that for [redacted] studies using B.a. Ames, [redacted] did not grow [redacted] own spores. Initially [redacted] obtained a small amount of B.a. Ames from [redacted] needed more [redacted] Ames Strain spores for [redacted] research. [redacted] advised that the primary source of B.a. Ames used in [redacted] research was BRUCE IVINS' research group. IVINS provided [redacted] with [redacted] prepared spores contained in a slurry.

b6
b7C

[redacted] stated that when [redacted] work at USAMRIID was concluded, [redacted] turned over the remainder of [redacted] B.a. Ames strain slurry to [redacted] advised that there is written documentation regarding the transfer of the B.a. to [redacted] advised that [redacted] never transferred any B.a. to any other researcher, nor did [redacted] take any B.a. out of Building [redacted]

b6
b7C

A review of [redacted] financial records was unremarkable and revealed no connections to New Jersey.

Time-line First Mailing (5:00 p.m., 09/17/01 through 8:00 p.m., 09/18/01)

A time-line of [redacted] activities for the likely time periods of the mailing of the anthrax laced letters from Princeton, New Jersey was compiled using USAMRIID security key card access records, telephone call records, credit card use, and statements made by [redacted] The time-line focused on any six hour period for which [redacted] would be unaccounted, with the premise that it takes six hours to drive round trip from Frederick, Maryland to Princeton, New Jersey.

b6
b7C

[redacted] provided the interviewing agents with an [redacted] Statement of Account which indicates a debit was made from [redacted] account on 09/17/2001 at [redacted] Frederick, Maryland. [redacted] advised that the debit was made by [redacted] as [redacted] was working at USAMRIID on that day. [redacted] also provided the agents with an [redacted] billing statement in the name of [redacted] who [redacted] advised is [redacted] The statement showed a telephone call at 9:13 p.m. from telephone number [redacted] home telephone, to [redacted] a USAMRIID telephone number. [redacted] advised that this indicates [redacted] calling [redacted] while [redacted] was working at USAMRIID.

USAMRIID key card access records reveal that [redacted] was at USAMRIID from [redacted] returned to USAMRIID at [redacted] and remained there until [redacted] according to the key card access records.

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 01/05/2003

There is a 10 hour period in the first mailing period for which [] whereabouts can not be accounted.

Time-line Second Mailing (3:00 p.m., 10/06/01 through 11:00 a.m., 10/09/01) .

[] advised that from []
through []

[]

[] could provide no other information regarding [] whereabouts during the time period of the second mailing.

[] was provided a polygraph examination on 12/16/2003 which targeted any knowledge of or involvement in the anthrax mailings. The report of the polygraph examiner states that [] during the polygraph examination.

b6
b7C
b7E

[] was interviewed on [] related to the investigation and was forthcoming with investigators on both occasions.

Examples of [] handwriting were submitted for comparative handwriting analysis to the writing on the letters and envelopes of the anthrax-laced mailings. The results of the analysis were []

Investigation has revealed no direct, testimonial or circumstantial evidence which indicates that [] was involved in the preparation or mailing of the anthrax-laced letters.

Based upon the above, the investigation regarding [] is considered complete. Unless information is obtained to suggest that [] was involved in the mailing of the anthrax-laced letters, no further investigation of [] is intended.

card access records, telephone call records, credit card use records and statements made by [redacted] The time-line focused on any six-hour period for which [redacted] would be unaccounted, with the premise that it takes six hours to drive round trip from Frederick, Maryland to Princeton, New Jersey.

b6
b7C

Time-line First Mailing (5:00 p.m., 9/17/01 through 8:00 p.m., 9/18/01)

On 9/17/03, key card access records show [redacted] entering building [redacted] and leaving building [redacted] at [redacted] The longest time period without key card activity is approximately [redacted]

b6
b7C

On [redacted] [redacted] enters building [redacted] [redacted] departs at [redacted] The longest period without key card activity on [redacted] is approximately [redacted]

Time-line Second Mailing (3:00 p.m., 10/06/01 through 11:00 a.m., 10/09/01)

There are no key card access records for [redacted] on [redacted]

b6
b7C

On 10/9/01, [redacted] enters building [redacted] and [redacted] badges the final time at [redacted] The longest period without key card activity is approximately [redacted]

b6
b7C

It should be noted that additional information has not been located to show [redacted] whereabouts during [redacted]

b6
b7C
b7E

[redacted] submitted to a polygraph on [redacted]

In addition to the findings presented above and the fact that [redacted] has cooperated with this investigation, no evidence has been discovered to date which suggests that [redacted] may have been involved in the anthrax-laced letter mailings. Unless or until such evidence is identified, no further investigation of [redacted] is intended in this case.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/14/2004

On [redacted] date of birth [redacted]
[redacted] social security account number [redacted] home address [redacted]
[redacted] was interviewed at [redacted]
[redacted] place of employment, the United States Army Medical Research
Institute of Infectious Diseases (USAMRIID), 1425 Porter Street, Fort
Detrick, Maryland, telephone [redacted] After being advised of the
identity of the agents and the purpose of the interview, [redacted]
provided the following information:

b6
b7C

[redacted] earned [redacted] degree
in [redacted] from [redacted]
[redacted] faxed a copy/
of [redacted] curriculum vitae (c.v.) to SA [redacted] later the same day. [redacted]

[redacted] c.v. outlined [redacted] work experience as follows:
prior to attending [redacted] worked as [redacted]
from [redacted] until [redacted] at [redacted] in [redacted]

[redacted] has been in [redacted] current position of [redacted]
[redacted] USAMRIID since [redacted]

[redacted] uses the Ames strain of *Bacillus anthracis* (B.a.) for
[redacted] work with anthrax [redacted]

b6
b7C

[redacted] has never used modified G sporulation media. [redacted]
usually uses a single colony culture technique when [redacted] streaks for
isolation. [redacted] has never dried B.a., and did not of anyone who had.
[redacted] initially obtained a frozen stock of vegetative B.a.
Ames cells from [redacted] who had obtained the stock from BRUCE

b6
b7C

Investigation on 06/07/2004 at Fort Detrick, Maryland

File # 279A-WF-222936-POIV/279A-BA-C101392-1544 Date dictated N/A

Postal Inspector [redacted]

by SA [redacted]

279A-WF-222936-POI, 279A-BA-C101392

Continuation of FD-302 of

[REDACTED]

, On 06/07/2004, Page 2

b6
b7C

IVINS. [REDACTED] did not know of anything in [REDACTED] work area that had not been submitted to the FBI repository (FBIR), and advised that when researchers leave USAMRIID, someone usually takes over their stocks of material.

[REDACTED] has no contact with [REDACTED] Division of USAMRIID, and had no knowledge of any bacterial contamination within any [REDACTED] Division hot suites. [REDACTED] could not think of a reason that any such contamination would have happened, however it could have occurred during the use of bacteria [REDACTED] [REDACTED] did not know whether paraformaldehyde or glutaraldehyde fumigation have ever been employed [REDACTED] suites. Paraformaldehyde fumigation is used to decontaminate the airlocks in both the Bacteriology and Virology divisions.

b6
b7C

[REDACTED]

There are many individuals at USAMRIID who are experts in anthrax spore production. Although USAMRIID probably has the equipment necessary to dry spores, such as lyophilizers and freeze dryers, no one at the institute has the expertise to do so. [REDACTED] did not know what the process would be to make the material into a fine powder, and [REDACTED] did not know if anyone at USAMRIID possessed that knowledge.

b6
b7C

It would be possible to remove a select agent from a containment suite at USAMRIID, and it would be almost impossible to prevent a determined individual from doing so. [REDACTED] advised that a person would only need a droplet in a tube or dried on a piece of paper. [REDACTED] had no knowledge that anyone had attempted such an act. As all the personnel in the containment areas have been vaccinated, a person trying to remove a select agent would not have to worry about the possibility of self infection.

b6
b7C
b7F

[REDACTED] was not aware of anyone who said that they might make a select agent for use in some improper fashion. There has been some discussion around USAMRIID about how easy it might be to make a select agent for such a use. This is because they want to avoid inadvertently creating something more virulent or something that would be easier to use as a weapon, and also because they want to avoid the appearance of that.

b6
b7C

279A-WF-222936-POI, 279A-BA-C101392

Continuation of FD-302 of [REDACTED]

, On 06/07/2004 , Page 3

[REDACTED] did not know of anyone with the access and ability to create or handle dangerous biological agents who expressed hostile attitudes toward any political organization, the media, or others. [REDACTED] did not suspect anyone of possibly being associated with the mailings of the anthrax letters.

b6
b7C

There were no individuals with whom [REDACTED] worked that [REDACTED] thought were lax in handling dangerous items or inappropriately interested in agents. There was no one at USAMRIID who was rumored to be interested in gaining access to anthrax or any other agents or the means to produce them without a specific need to do so.

[REDACTED] advised that [REDACTED] purposely avoided learning weaponization techniques. In order to send anthrax through the mail, a person would need to have the capacity to grow a large amount of spores. The spores would need to be centrifuged to concentrate them, and some kind of powder or silicon would need to be added so that the material did not clump when it dried. The powder needs to be fine so that it will disperse and enter deep into the lungs. After the material was made into a powder, it would need to be placed in a freeze dryer.

[REDACTED] was not aware of anyone who expressed a special interest in being able to get around forensic techniques. [REDACTED] did not know of any work being conducted with B.a. Ames or its simulants which was not part of a research project. [REDACTED] advised that not all researchers record all of their work as many of them do not take good notes.

b6
b7C

Neither [REDACTED] nor any of [REDACTED] associates have any personal or professional association with Trenton, Princeton, or any other area of New Jersey (NJ). [REDACTED] did not travel to NJ in September or October of [REDACTED]

[REDACTED] does not use any plastic storage containers, such as Sterilite boxes, for [REDACTED] work at USAMRIID. [REDACTED] may have seen a similar type container in the Suite [REDACTED] cold room that was used specifically for storing spores. The container has been present in the cold room for approximately one year.

b6
b7C

[REDACTED] has never purchased pre-stamped envelopes like the ones used in the mailings. [REDACTED] did not handle any of the anthrax-laced letters or envelopes and [REDACTED] did not do any analytical work on the evidence in this case.

b6
b7C

279A-WF-222936-POI, 279A-BA-C101392

Continuation of FD-302 of [redacted], On 06/07/2004, Page 4

[redacted] has never seen, met, or spoken with [redacted] although [redacted] has heard rumors about [redacted] around USAMRIID.

[redacted] thought that the mailer must be either [redacted] because of their experience, and because they know so much about anthrax. [redacted] could have obtained the anthrax from [redacted] There was much less security during the time frame when [redacted] was at USAMRIID, and at that time, people provided strains to others without documenting the transfer. b6 b7C

[redacted] has never hosted a foreign visiting scientist, and [redacted] is not a member of the [redacted]

[redacted] does not maintain a calendar, and advised that [redacted] would check [redacted] computer for any files generated for the time periods September 17-18, 2001 and October 5-9, 2001. [redacted]

[redacted] is willing to submit to a polygraph examination limited to the targeting of any potential involvement with the anthrax mailings of 2001.

SA [redacted] received a fax from [redacted] later the same day, during which [redacted] advised that [redacted] did not have any emails or documents from those two time periods.

Synopsis: Report results of investigation regarding [REDACTED]

Details: [REDACTED] date of birth [REDACTED] social security account number [REDACTED] is employed at the United States Army Medical Research Institute of Infectious Diseases (USAMRIID). In the course of [REDACTED] employment with USAMRIID, [REDACTED] has had knowledge of *Bacillus anthracis* (B.a.).

[REDACTED] holds a [REDACTED] degree in [REDACTED] from [REDACTED] and is [REDACTED] currently serves in [REDACTED] Division [REDACTED] at USAMRIID as [REDACTED] a position [REDACTED] has held since [REDACTED]

[REDACTED] does not access any of the containment suites at USAMRIID, and [REDACTED] does not grow, handle, or maintain any stocks of *B.a.* Ames spores or vegetative matter. [REDACTED] requests [REDACTED]

b6
b7C

[REDACTED] did not know whether the *B.a.* Ames [REDACTED] samples [REDACTED] obtains from [REDACTED] group were originally from BRUCE IVINS' or [REDACTED] stock. [REDACTED]

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 06/16/2004

[redacted] never handled or worked with the Daschle, Leahy, Brokaw, or New York Post letters and envelopes. [redacted] could not specifically recall performing PCR on any of the evidentiary material in the captioned case, however [redacted] assumed that [redacted] did some PCR and DNA work with the evidence.

[redacted] advised that [redacted] A review of [redacted] financial records was unremarkable and revealed no connections to the Princeton or Trenton areas of New Jersey.

b6
b7C

[redacted] advised that [redacted] does not know [redacted]

A time-line of [redacted] activities for the likely time periods of the mailing of the anthrax-laced letters from Princeton, New Jersey was compiled using USAMRIID security key card access records, telephone call records, credit card use, and statements made by [redacted]. The time-line focused on any six hour period for which [redacted] would be unaccounted, with the premise that it takes six hours to drive round trip from Frederick, Maryland to Princeton, New Jersey.

Time-line First Mailing (5:00 pm, 09/17/2001 through 8:00 pm, 09/18/2001)

A review of USAMRIID security key card access records for [redacted] indicated the following: [redacted] was in and around Building [redacted] from [redacted] until [redacted] and [redacted] entered Building [redacted] at [redacted] and exited at [redacted]

b6
b7C

Records for the telephone number at the residence [redacted] indicated one long distance call from 1:28pm until 1:29pm on 09/17/2001.

[redacted] advised that [redacted] was working [redacted]

b6
b7C

Time-line Second Mailing (3:00pm, 10/06/2001 through 11:00 am, 10/09/2001)

A review of USAMRIID security key card access records for [redacted] indicated the following: [redacted] Building [redacted] and exited at [redacted] on [redacted] entered Building [redacted] and exited at [redacted] on [redacted] and [redacted] was in and around Building [redacted] from [redacted]

b6
b7C

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 06/16/2004

[redacted] There are no key card records for
[redacted] on [redacted]

Records for [redacted] credit card subscribed to by [redacted]
[redacted] indicated a purchase at [redacted]
[redacted] Maryland (MD) on 10/08/2001.
Records for [redacted] credit card subscribed to by [redacted]
[redacted] indicated the following purchases
on 10/07/2001: [redacted] MD and
[redacted] in Frederick, MD.

b6
b7C

Records for the telephone number at [redacted]
[redacted] residence indicated the following: one long distance
call from 7:35pm until 7:43pm on 10/06/2001; four long
distance calls on 10/07/2001 from 7:03am until 7:04am, from
11:16am until 11:17am, from 11:17am until 11:18am, and from
11:58am until 12:26pm; one long distance call from 7:04am
until 7:05am on 10/08/2001; and one long distance call from
3:52pm until 3:53pm on 10/09/2001.

[redacted] advised that [redacted]
[redacted]

[redacted] was interviewed by investigators on
[redacted] and was
cooperative on all occasions.

[redacted] advised that [redacted] was willing to submit to a
polygraph examination targeting any knowledge of, or
involvement in, the anthrax mailings. [redacted] was not asked to
submit to the polygraph as [redacted] has apparently never had access
to B.a. at USAMRIID. [redacted]

b6
b7C
b7E

Investigation has revealed no direct, testimonial,
or circumstantial evidence which indicates that [redacted] was
involved in the preparation or mailing of the anthrax-laced
letters.

b6
b7C

Unless information is obtained to suggest that [redacted]
[redacted] was involved in the mailing of the anthrax-laced
letters, no further investigation of [redacted] is intended.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/14/2004

On June 8, 2004, [redacted] date of birth [redacted]
[redacted] social security account number [redacted] home
address [redacted]
[redacted] mobile telephone [redacted] was interviewed at [redacted]

[redacted] After being advised of the identity
of the agents and the purpose of the interview, [redacted] provided the
following information:

[redacted] provided a copy of [redacted] curriculum vitae (c.v.)
which is maintained in an FD-340 in the 1A section of the file.
[redacted] educational and employment histories as listed on [redacted] c.v. are
as follows. [redacted] received a [redacted]
degree in [redacted] from [redacted]

[redacted] worked as a [redacted]
[redacted] at the [redacted] in [redacted]
[redacted] from [redacted] as a [redacted] at [redacted]
[redacted] from [redacted] as a [redacted]
[redacted] at [redacted]
[redacted] and from [redacted]
[redacted] as a [redacted] at the United States Army Medical
Research Institute of Infectious Diseases (USAMRIID), Fort Detrick,
MD.

[redacted] only used *Bacillus anthracis* (B.a.) Ames spores and
[redacted] has never grown
B.a. Ames, and advised that [redacted]
[redacted] did not know whether the
B.a. Ames that [redacted] worked with had originally been obtained from
BRUCE IVINS or [redacted]

[redacted] work area was Room [redacted]
in Building [redacted] and [redacted] work area was Suite [redacted] in Building [redacted]
[redacted] The [redacted] was located in
Room [redacted] and select agents were never used in that room because
of the location of [redacted] Room [redacted] was [redacted]
lab space, and Room [redacted] was the main laboratory space in the
suite and where most of the live agent work was done. The Leahy
letter was opened in Room [redacted] and stored in Room [redacted] DNA
extractions were performed in Room [redacted]

[REDACTED]

Piggybacking occurred through doorways into the hot suite change areas, but never into the hot suites. [REDACTED] was not a member of the [REDACTED], [REDACTED] never hosted any foreign visiting scientists at USAMRIID.

b6
b7C

[REDACTED] Although [REDACTED] knew of cross contamination of viruses within Virology Division lab space, [REDACTED] never heard of any bacterial contamination of *Bacillus sp.* in the Virology labs.

[REDACTED] had no concerns about USAMRIID or its personnel. Although the USAMRIID employees are quirky, they are all good people and have no intention to harm anyone. [REDACTED] had no reason to suspect that any of [REDACTED] co-workers [REDACTED] at USAMRIID had any involvement with the 2001 anthrax mailings. [REDACTED] did not know many individuals from the other divisions at USAMRIID.

[REDACTED] had no knowledge that anyone was attempting to gain access to select agents without a specific need to do so. [REDACTED] advised that strict inventories were not maintained prior to the 2001 anthrax mailings, however no one ever tried to touch other people's lab materials. [REDACTED] never observed any strange behavior inside the containment suites.

[REDACTED] has never seen, met, or spoken with [REDACTED] [REDACTED] is currently working in the [REDACTED]

b6
b7C

[REDACTED] has never purchased any pre-stamped envelopes, nor has [REDACTED] ever done so at a postal vending machine in Frederick, Maryland. [REDACTED] has never seen any such envelopes around USAMRIID.

279A-WF-222936-POI

Continuation of FD-302 of [REDACTED]

, On 06/08/2004 , Page 3

[REDACTED] does not have any personal or professional association with Trenton or Princeton, New Jersey nor with Princeton University.

[REDACTED] had been hired at USAMRIID by [REDACTED]

b6
b7C

[REDACTED] does not keep a personal calendar. [REDACTED] advised that [REDACTED] laboratory protocols were labeled by date and could be found in [REDACTED] lab notebooks or binders. These protocols were for [REDACTED]. The binders as well as CD-Roms containing the protocols were kept [REDACTED]

b6
b7C

[REDACTED] advised that [REDACTED] was willing to submit to a polygraph examination targeting any knowledge of or involvement in the 2001 anthrax mailings.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/30/2004

[redacted] date of birth [redacted]
social security number [redacted] was interviewed on [redacted]

[redacted] After being advised of the identity
of the interviewing agent and the purpose of the interview, [redacted]
provided the following information:

[redacted]

b6
b7C

[redacted]

[redacted] did a lot of aerosol challenges,
together with [redacted]

[redacted] noted that
[redacted] did not have a security clearance while [redacted] was at
USAMRIID.

b6
b7C

[redacted]

[redacted] is not aware of
any substitute for antifoam.

Investigation on 06/25/2004 at [redacted]

File # 279A-WF-222936-POI-1261

Date dictated N/A

TFA [redacted]
by SA [redacted]
[redacted] wpd

This document contains neither recommendations nor conclusions of the FBI. It is the property of the FBI and is loaned to your agency; [redacted]

279A-WF-222936-USAMRIID

b6
b7C

Continuation of FD-302 of [REDACTED], On 06/22/2004, Page 2

[REDACTED]

[REDACTED] was shown a copy of the aerosol exposure data forms from [REDACTED] and [REDACTED] anthrax aerosol challenges. [REDACTED] noted that the nebulizer utilized for the [REDACTED] aerosol challenge was a new nebulizer.

[REDACTED]

The [REDACTED] aerosol challenge was not the first time [REDACTED] had been used for an anthrax aerosol challenge. There were to types of chambers used [REDACTED] in an aerosol challenge. One chamber was a box and the other was a tower. The box chamber could not guarantee the exposure of material to [REDACTED] where as the tower chamber was almost an exact exposure. [REDACTED] does not recall using the tower chamber on anthrax aerosol challenges. The aerosol challenge from [REDACTED] was done using a box exposure chamber.

b6
b7C

[REDACTED] recalled that BRUCE IVINS utilized room [REDACTED] for laboratory space. [REDACTED] had assisted in some post-challenge work in room [REDACTED]. [REDACTED] remembered IVINS' room having two (2) weeks worth of trash in it at times. [REDACTED] and noticed the amount of trash. There were often plates lying around IVINS lab and the incubator was often full of plates. [REDACTED] never saw IVINS' staff utilize the autoclave in the [REDACTED] hood lines. [REDACTED] might recall if anyone else used the autoclaves belonging to [REDACTED]. [REDACTED] never looked at the plates after they had been sitting around. The bags of trash in IVINS' lab space were not labeled. [REDACTED]

[REDACTED] The bags would be stacked up in a metal [REDACTED]

279A-WF-222936-USAMRIID

b6
b7C

Continuation of FD-302 of [REDACTED], On 06/22/2004, Page 3

container inside the room. [REDACTED]
[REDACTED]

[REDACTED] remembered [REDACTED] from [REDACTED] in
IVINS' lab using the hood.

[REDACTED] noted to the interviewing agents that it would not be
hard to slip out of USAMRIID with material.

A copy of the aerosol exposure log sheet will be maintained
in the 1A containing the notes of this interview.

b6
b7C

Re: 279A-WF-222936-POI, 08/16/2004

[REDACTED]

b6
b7C

[REDACTED]

[REDACTED] received the cultures from BRUCE IVINS in a [REDACTED]. The samples were then autoclaved and irradiated to destroy them.

[REDACTED] has worked in the following areas at USAMRIID; Room [REDACTED] in building [REDACTED] and in the [REDACTED] areas.

[REDACTED] has used the hot areas of building [REDACTED] and room [REDACTED]. [REDACTED] has observed others using the cooler for storage of unused plates, kit reagents and had used it to store plates due to not having a separate refrigerator.

[REDACTED]

b6
b7C

A time-line of [REDACTED] activities for the likely periods of the mailing of the anthrax letters from Princeton, New Jersey was compiled using USAMRIID Facility Key Card Access records, telephone call records and credit card records. The time-line focused on any six-hour period for which [REDACTED] would be unaccounted, with the premise that it takes six hours to drive round trip from Frederick, Maryland to Princeton, New Jersey.

[REDACTED] resides [REDACTED]
[REDACTED] address.

Telephone toll records for 2001 documented that telephone number [REDACTED] is registered in the name of [REDACTED]. The telephone is a household telephone and toll records do not indicate who specifically made the telephone calls.

b6
b7C

Reviews of [REDACTED] financial records for the year 2001 revealed no connections to New Jersey. [REDACTED] Equifax credit report documented [REDACTED]

[REDACTED]

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 08/16/2004

[REDACTED]

b6
b7C

Time-line First Mailing (5:00 p.m., 9/17 through 8:00 p.m., 9/18)

USAMRIID Facility Key Card Access records documented that [REDACTED] entered Building [REDACTED] on [REDACTED] remained at work until [REDACTED] exit at [REDACTED] there were approximately 10 hours in which [REDACTED] was unaccounted until [REDACTED] returned to work and entered Building [REDACTED] [REDACTED] last documented key card transaction occurred on [REDACTED] The longest period between documented key card transactions during work hours on [REDACTED] was approximately 3 hours and 5 minutes.

b6
b7C

A review of [REDACTED] telephone toll records were not available for the time-frame due to being destroyed by [REDACTED] [REDACTED] policy is to only retain phone records for a period of 18 months before destroying the records.

A review of [REDACTED] transactions did not document any purchases during this time frame.

Time-line Second Mailing (3:00 p.m., 10/06 through 11:00 a.m., 10/09)

There were no USAMRIID Key Card Access transactions recorded for [REDACTED]

b6
b7C

[REDACTED]
[REDACTED] a review of local telephone call records document that a call was made at 8:30 PM on 10/07/01 to number [REDACTED] Maryland.

A review of [REDACTED] transactions did not document any purchases during this time frame.

Additional Information:

[REDACTED] has been interviewed on at least two occasions concerning this investigation and has been cooperative and forthcoming with investigators.

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 08/16/2004

b6
b7C

[redacted]
[redacted] Doctor Bruce Ivins provided a collection of geographically diverse Ba for [redacted]
[redacted] never dried Ba or produced spores from Ba.

[redacted] never entered the hot side of building [redacted] and was never in the aerosol challenge lab.
[redacted] never saw [redacted] at USAMRIID and is not aware of any coworkers who have claimed to have known [redacted]

During the time period encompassing September 17 and 18, [redacted] stated [redacted] was working in USAMRIID [redacted]
[redacted]

[redacted] does not remember specifically where [redacted] the Columbus Day holiday weekend, 10/6/01-10/9/01. [redacted] does not recall traveling through or in New Jersey during September or October 2001. [redacted]
[redacted]

A time-line of [redacted] activities for the likely periods of the mailing of the anthrax letters from Princeton, New Jersey was compiled using USAMRIID Key-Card Access records, telephone toll records, and credit card records. The time-line focused on any six-hour period for which [redacted] would be unaccounted, with the premise that it takes six hours to drive round trip from Frederick, Maryland to Princeton, New Jersey.

b6
b7C

Telephone toll records documented that telephone number [redacted] was registered in the name of [redacted]
[redacted] The telephone is a household telephone and toll records do not indicate who specifically made the telephone calls. Reviews of [redacted] financial and home telephone records for the year of 2001 did not reveal any New Jersey connections.

There have been no allegations of [REDACTED] being involved
in the Ba mailings, and interviews have not revealed any
motivations for [REDACTED] involvement. In addition to the findings
presented above, no evidence has been discovered to date that
suggests that [REDACTED] may have been involved in the anthrax-laced
letter mailings. Unless or until such evidence is identified, no
further investigation of [REDACTED] is intended in this case.

[redacted] work
address: [redacted] was
interviewed at [redacted] on the morning of January
03, 2005. After being advised of the identity of the interviewing
Special Agent (SA) and the nature of the interview, [redacted] provided
the following information:

[redacted]
[redacted] further advised the Weis Pharmacy #110
located at the 199 Thomas Johnson Drive address has always been
called Weis Pharmacy and has been in business for approximately
twenty years.

[redacted] advised when an individual has a prescription filled
at Weis Pharmacy #110, all information pertaining said prescription
is submitted electronically to Caremark for billing. [redacted] further
advised it is the responsibility of Caremark to submit insurance
claims to the various insurance companies and not Weis Pharmacy
#110.

[redacted] advised if an individual had a prescription filled
at Weis Pharmacy #110 and that individual had insurance, then Weis
Pharmacy #110 would fill that prescription and submit a complete
electronic version of that transaction to Caremark in order for
Caremark to bill the specific insurance company. [redacted] further
advised in this instance, both Weis Pharmacy #110 and Caremark
would maintain identical records for the same transaction even
though Caremark never dispensed any medication.

(WFO NOTE: Investigation to date has indicated BRUCE
IVINS, Date of Birth (DOB): April 22, 1946, had prescription #: 6787598 filled on March 01, 2001, prescription #: 6805383 filled on October 18, 2001, and prescription #: 6806248 filled on October 29, 2001 at Weis Pharmacy #110, address: 199 Thomas Johnson Road, Frederick, Maryland. In addition, investigation also produced records from Caremark, Custodian of Records for Theracom Incorporated. Caremark records also indicated Ivins, DOB: April 22, 1946, had prescription #: 6787598 filled on March 01, 2001, prescription #: 6805383 filled on October 18, 2001, and prescription #: 6806248 filled on October 29, 2001 at Theracom

Title: AMERITHRAX;
Major Case 184

Synopsis: Report status of investigation regarding Bruce Edwards Ivins.

Details: BRUCE EDWARDS IVINS, date of birth 04/22/1946, social security account number 280-44-5449, is employed at the United States Army Medical Research Institute of Infectious Diseases (USAMRIID). In the course of his employment with USAMRIID, IVINS has had access to, knowledge of, and experience working with *Bacillus anthracis* (B.a.).

IVINS has a Bachelor of Science (BS) degree in Bacteriology, a Master of Science (MS) degree in Microbiology, and a Doctor of Philosophy (PhD) degree in Microbiology all from the University of Cincinnati. His position at USAMRIID is that of Microbiologist in the Bacteriology Division, a position which he has held since 1980.

In 1985, IVINS obtained B.a. Ames from the original sample received at USAMRIID in 1981. He is one of the primary anthrax researchers at USAMRIID, and he produces and maintains B.a. Ames spore preparations.

IVINS removed material from the Daschle letter in Suite [REDACTED] at USAMRIID and performed a concentration count. He did not handle the Leahy or Post letters, however he did work with the evidentiary material contained therein. IVINS never handled the Brokaw letter, nor did he work with any of the material from that letter.

A review of IVINS's financial records is ongoing.

IVINS advised that he does not know [REDACTED]

A time-line of IVINS's activities for the likely time periods of the mailing of the anthrax-laced letters from Princeton, New Jersey (NJ) was compiled using USAMRIID security key card access records, telephone call records, credit card use, and statements made by IVINS. The time-line focused on any six hour period for which IVINS would be unaccounted, with the premise that it takes six hours to drive round trip from Frederick, Maryland (MD) to Princeton, New Jersey.

Time-line First Mailing (5:00 pm, 09/17/2001 through 8:00 pm, 09/18/2001)

A review of USAMRIID security key card access records for IVINS indicated the following:

09/17/2001

6:58am-11:14am: There are many keycard swipes, ending with "Corridor to Bacteriology out".

7:00pm-7:13pm: IVINS enters and then exits through the rear door of Building 1425.

09/18/2001

7:02am-8:35am: There are three keycard swipes ending with "Corridor to Bacteriology out".

8:14pm-8:58pm: He enters the rear door of 1425 into Bacteriology, and then exits via the rear door of 1425.

A review of IVINS' personnel record at USAMRIID indicated that he took four hours of annual leave on 09/17/2001.

Records for a People's Bank credit card subscribed to by IVINS [REDACTED] indicated two purchases at Rosemont Service Center in Frederick, MD and two telephonic registrations with the College Board for the October Scholastic Aptitude Test (SAT) on 09/17/2001. There were no purchases made on 09/18/2001.

b6
b7C

Records for the telephone number at the residence IVINS [REDACTED] provided no further information about his whereabouts on these dates.

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 12/10/2004

b6
b7C

Investigation has revealed that IVINS traveled for work to Covance Laboratory in Denver, Pennsylvania (PA) on 09/18/2001 [REDACTED]

Time-line Second Mailing (3:00pm, 10/06/2001 through 11:00 am, 10/09/2001)

A review of USAMRIID security key card access records for IVINS indicated the following:

10/07/2001

2:34pm-3:26pm: IVINS enters through the rear door of 1425 into Bacteriology, and then exits via the rear door of 1425.

10/08/2001

1:49pm-3:04pm: He enters through the rear door of 1425 into Bacteriology, and then exits via the rear door of 1425.

There was no key card activity for IVINS on 10/06/2001.

Records for a People's Bank credit card subscribed to by IVINS [REDACTED] indicated the following purchases: Merchant Tire #1013 on 10/06/2001; Rosemont Service Center in Frederick, MD on 10/07/2001; Wal-Mart in Frederick, MD on 10/08/2001; and CVS #1474 in Frederick, MD on 10/08/2001.

Records for the telephone number at the residence IVINS [REDACTED] indicated the following calls: on 10/06/2001 from 11:32am until 11:40pm, and from 11:40am until 11:49am; on 10/07/2001 from 8:38pm until 8:39pm; and on 10/08/2001 from 5:38pm until 5:39pm and from 7:13pm until 7:14pm.

b6
b7C

[REDACTED]

IVINS laboratory notebook containing the protocol for a vaccine challenge referred to as BOO-03 documented the planned trip to Covance Laboratory on 09/17/2001 to deliver vaccine. It also included an entry dated 10/03/2001: "this experiment has been postponed indefinitely". There were no further entries in the notebook.

IVINS has been interviewed by investigators numerous times and has been cooperative on all occasions, often contacting the investigators after the interview is over to provide additional information and documentation. He offered

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 12/10/2004

to allow investigators to copy his computer hard drive at USAMRIID.

IVINS was administered a polygraph examination on 02/28/2002 which targeted any knowledge of, or involvement in, the anthrax mailings. The report of the polygraph examiner stated that [REDACTED] by IVINS during the polygraph examination. [REDACTED]
[REDACTED]

b7E

During the Amerithrax pond dive effort in December 2002, IVINS came to the search site to support the efforts of the Frederick chapter of the American Red Cross, of which he is a member. IVINS was asked to leave the site because of the potential for conflict of interest. He provided a hard copy of the Red Cross electronic mail (email) solicitation for volunteers.

IVINS' personnel record indicated that he contributes regularly to the Combined Federal Campaign and has received recognition at USAMRIID for outstanding achievements to include performing cardiopulmonary resuscitation (CPR) on a co-worker.

When queried about any affiliation with New Jersey, IVINS advised that his father graduated from Princeton University in 1928.

IVINS' house was the subject of a positive scent dog hit in 2002.

Rosemont Service Center could not provide any additional information about the two purchases made there using IVINS' People's Bank credit card on 09/17/2001. Merchant Tire also could not provide any additional information about the purchase made there using the same credit card on 10/06/2001.

Wal-Mart provided copies of all receipts for purchases made there during September and October 2001 using IVINS' People's Bank credit card. A purchase of two 30 quart snaptop containers was made on 09/26/2001, however investigation revealed that these containers were not of the same size as the Sterilite container found during the December 2002 pond search.

Only one telephone call was made from IVINS' residence to a New Jersey telephone number during 2001. The

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 12/10/2004

subscriber information revealed that the call was made to The College Board in Ewing, NJ.

All calls made to New Jersey telephone numbers from IVINS' work telephone number were researched. The subscriber information revealed that the calls were made to Summit Bank in Ridgefield Park, NJ; Gentek in Summit, NJ; and Elusys Therapeutics in Caldwell, NJ. Both Gentek and Elusys Therapeutics are companies that deal with research institutions.

b6
b7C

Investigation revealed that IVINS filled the following prescriptions in 2001 at Weis Pharmacy #110 in Frederick, Maryland: 03/01/2001, [redacted] (mg); 10/18/2001, [redacted] and 10/29/2001, [redacted]

[redacted] Caremark Pharmacy has records of these same prescriptions being filled for IVINS, however investigation has revealed that Caremark does the billing for Weis Pharmacies. IVINS was also taking [redacted] [redacted] for approximately one year prior to the anthrax mailings.

Ongoing genetic screening of material in the FBI repository has indicated that much of the material that has matched the B.a. Ames contained in the anthrax letters was under IVINS' control. IVINS provided names of additional researchers and technicians who had access to this material.

The investigation regarding BRUCE EDWARDS IVINS is ongoing.

b6
b7C

[redacted] does not recall ever using the walk-in refrigerator in room [redacted] of Building [redacted]. The only

[redacted]

b6
b7C

[redacted] does not remember specific instances of "piggybacking" at USAMRIID. [redacted] believes that [redacted] might have held a door open for someone right behind [redacted] a few times but could not remember specifics. [redacted] sure that "piggybacking" occurred while [redacted] was employed at USAMRIID.

[redacted] never used large plastic storage containers while [redacted] worked at USAMRIID. [redacted] never purchased pre-stamped envelopes and never bought envelopes from the vending machines at USAMRIID.

b6
b7C

When asked whether [redacted] would know how to accomplish the anthrax mailings [redacted] stated that [redacted] would not know how to dry B.a. and then send it through the mail. [redacted]

[redacted]

[redacted] nor has [redacted] been to Trenton, New Jersey. [redacted] knows of a few people who attended Princeton University, but [redacted] does not know of anyone who continues to have ties to that city. [redacted] does not know of anyone with ties to Trenton, New Jersey.

[redacted] never knew [redacted] had never seen [redacted] at USAMRIID and [redacted] did not look familiar to [redacted] after [redacted] was never a member of the [redacted] and has never hosted any foreign visiting scientists.

b6
b7C

[redacted] has never worked with foreign visiting scientists. [redacted] knew of two non-USAMRIID employees who worked in suite [redacted] but did not know if they were from another country or another lab within the United States.

The likely time period for the first anthrax mailing was from Monday 9/17/2001 5:31 pm to Tuesday 9/18/2001 11:59 am. A review of [redacted] telephone toll records showed that on 9/18/2001, three telephone calls were made from [redacted] one to [redacted] (7:51 pm for 8 minutes), one to [redacted] (8:00 pm for 1 minute), and one to [redacted]

b6
b7C

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 01/03/2005

(8:50 pm for 1 minute). There were no credit card purchases by [redacted] during the first anthrax mailings.

During the likely time period of the second anthrax mailings (Friday 10/5/2001 12:01 pm to Tuesday 10/9/2001 11:59 am), [redacted] made several phone calls from [redacted] telephone number. On 10/5/2001, one call was made to [redacted] at 1:57 pm for 35 minutes and another call was made to [redacted] at 7:45 pm for 9 minutes. [redacted] made a telephone call from [redacted] telephone number to [redacted] at 2:37 pm for 2 minutes. On 10/8/2001, [redacted] made a call from [redacted] at 10:41 pm for 49 minutes. On 10/9/2001, [redacted] made multiple calls to the same number in [redacted] at 1:30pm, 2:51pm, 3:43pm, and 4:06pm. The first three calls lasted one minute while the last call lasted 12 minutes. There were no credit card purchases by [redacted] during the second anthrax mailings.

b6
b7C
b7E

[redacted] did not conduct any travels on or shortly after September 11, 2001. The day of September 11, 2001,

[redacted]

[redacted] was asked whether [redacted] would agree to take a polygraph administered by the FBI Task Force on questions related to the anthrax mailings of 2001. [redacted] voluntarily agreed to take the polygraph. [redacted] was polygraphed on [redacted]

In addition to the findings presented above and the fact that [redacted] has cooperated with this investigation, no evidence has been discovered to date which suggests that [redacted] may have been involved in the anthrax-laced letter mailings. Unless or until such evidence is identified, no further investigation of [redacted] is intended in this case.

All necessary equipment for working with Ba was available in room [redacted], including a hood, a centrifuge with gradient, an incubator and a table top shaker. IVINS' office had a floor shaker to use for 5 Liter flasks. There were lyophilizers available, probably in suite [redacted] did not know who used or was responsible for the lyophilizers. [redacted] did not remember using a lyophilizer or ever drying Ba. [redacted] did remember spinning it down into pellets. [redacted] theorized that another researcher may have lyophilized it from that point. [redacted] remembered that Ba was freeze-dried, but [redacted] did not remember who did this nor where it was done. [redacted] did not remember any presentations done about drying Ba.

b6
b7C

_____ did not recognize the names _____

In preparation for the interview, _____

_____ never thought that the anthrax investigation would be pinpointed to USAMRIID. _____ felt files were kept secure there and people at USAMRIID would be able to protect themselves.

_____ mentioned that USAMRIID hires a lot of young soldiers who may be unaware of the virulence of the agents with which they work, and could be persuaded to acquire an agent for someone. _____ also thought that if this did happen, due to Army values the soldier would most likely alert an authority.

_____ was not aware of piggy-backing having occurred at USAMRIID while _____ was there. _____ could not think of anyone who was not safety conscious. _____

b6
b7C

_____ did not recall anything about IVINS or anyone else reinserting plasmids into avirulent Ba to make virulent Ba.

b6

Continuation of FD-302 of [REDACTED]

, On 01/25/2005 , Page 10

b6
b7C

[REDACTED] believed that this could be done, but did not know anyone who had.

[REDACTED] was not aware of anyone who worked in bioweapons, showed interest in the weaponization of Ba, or was rumored to have this interest. [REDACTED] did not know how to make weaponized Ba, but [REDACTED] thought it would need to be made into inhalable form, perhaps by freeze drying. [REDACTED] thought that the capability to make weaponized Ba existed at USAMRIID. [REDACTED] did not know how to transport weaponized Ba. [REDACTED] did not know who might have created the weaponized Ba that was used in the 2001 mailings.

[REDACTED] did not know anyone at USAMRIID who expressed a hostile attitude toward the government or media, and [REDACTED] did not know anyone to have expressed interest in being able to get around forensic techniques. [REDACTED] had no idea who might have sent the anthrax-laced letters. Members of People for the Ethical Treatment of Animals (PETA) protested at USAMRIID, but [REDACTED] did not believe that they were involved. [REDACTED] was not aware of anyone who would benefit from the mailings financially due to investments in the anthrax vaccine.

[REDACTED] did not work in the [REDACTED] suites, and [REDACTED] was not aware of any bacterial contamination that occurred at USAMRIID while [REDACTED] was there. [REDACTED] was not aware of anyone who did not handle Ba safely. After leaving the hot suite for the day, decontamination procedures included wiping down the work area with bleach, and turning on ultraviolet light under the hoods and in the room.

[REDACTED] did not have any associates in New Jersey, nor did [REDACTED] remember [REDACTED] traveling there in 2001.

279A-WF-222936-POI

Continuation of FD-302 of _____, On _____, Page 11

_____ did not remember seeing plastic storage containers at USAMRIID. Since plastic could not be decontaminated, only metal was used in the hot suites.

_____ used the Frederick Post Office to mail letters, but _____ never used the vending machines there. _____ never purchased or remembered seeing pre-stamped envelopes while _____ was at USAMRIID.

_____ never met _____ and only heard about _____ through the media. _____

_____ did not recall any work with Ba that was unofficial or not recorded. _____ did not remember any foreign visiting scientists while _____ was at USAMRIID. _____ did not handle the anthrax-laced letters nor did _____ do any analytical work on the case.

_____ did not provide anyone with Ba Ames strain nor did _____ send it to anyone. _____ did not remember anything about the Ba Ames strain stock from _____. _____ did not know where the Ba that _____ worked with came from.

_____ agreed to take a polygraph regarding the above information.

, On 02/13/2006 , Page 3

[REDACTED]

[REDACTED] was shown a copy of the floor plan of the [REDACTED] laboratory suite at USAMRIID (attached). [REDACTED] annotated the floor plan to identify the rooms assigned to particular researchers and where fermenters were located. None of the rooms were locked. Room [REDACTED] was used by [REDACTED]

[REDACTED]

[REDACTED] was a cold storage room that was cluttered with flasks and plates containing prepared media, reagents and bacterial stocks. Spore solutions of anthrax strains are stored in flasks in this cold room. [REDACTED]

[REDACTED] However, researchers obtained their select agent samples from the researcher that was the custodian of the stock. They did not directly obtain samples from the material stored in the cold room.

[REDACTED] was used by [REDACTED] This room once contained a

[REDACTED]

279A-WF-222936-POI

b6
b7C

Continuation of FD-302 of [REDACTED], On 02/13/2006, Page 4

A 5-liter fermenter in Room [REDACTED] was used for pilot fermentation runs. BRUCE IVINS lent the fermenter to [REDACTED]. [REDACTED] has never observed IVINS use a fermenter. IVINS does not use the fermentation method to grow his stock of Ames *B. anthracis*.

[REDACTED]

Suite [REDACTED] was used by [REDACTED]

Suite B3 was used by IVINS,

[REDACTED] has never heard of anyone employed at USAMRIID known as [REDACTED]

[REDACTED]

[REDACTED] BRUCE IVINS provided a tube containing approximately one milliliter of a purified 10^9 concentrated sample of Ames strain *B. anthracis*. [REDACTED]

[REDACTED]

b6
b7C
b7F

[REDACTED] stated that solutions of virulent Ames strain *Bacillus anthracis* were sometimes retained after challenges in the cold storage room of Suite [REDACTED] at the request of the principal investigator for comparison purposes. The principal investigator is ultimately responsible for ensuring the destruction of virulent material when it is no longer required. [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED] Virulent Ames strain *B. anthracis* was never grown in the fermenters. [REDACTED] opined that a fermenter may be able to grow spores in the appropriate media similar to what is done in a flask. However, it would likely take days to complete the process and would not go unnoticed. No one has expressed an interest in using fermenters to produce virulent Ames strain *Bacillus anthracis*. [REDACTED] has never observed the

b6
b7C

279A-WF-222936-POI

Continuation of FD-302 of [REDACTED]

, On 02/13/2006 , Page 5

b6
b7c

fermenters at USAMRIID being used by researchers of other facilities. All the fermenters have since been removed from Suite [REDACTED]. The 300 liter fermenter is the only one that [REDACTED] is aware of that was given to another facility. A record of fermentation runs may be stored on the computer that is associated with each fermenter.

[REDACTED] has never used a lyophilizer. However, there is a bench top SpeedVac located in the [REDACTED] Suite that is used to dry small quantities of *Bacillus anthracis* for weighing. Research using dry, powdered biological agents is restricted at USAMRIID. [REDACTED] was not aware that it was done until recently when [REDACTED] read a notice posted in the bathroom that alerted USAMRIID employees that [REDACTED] *anthracis* had been released in a biosafety level two laboratory in the facility. [REDACTED] saw the posting approximately two weeks ago and knows of no other details.

[REDACTED] was shown a photograph of a flask that was labeled [REDACTED] could not identify it and does not recall having seen it before. [REDACTED] noted that the handwriting on a label on the flask was similar to that of BRUCE IVINS. The photograph shown to [REDACTED] is maintained in the 1A section of the file.

[REDACTED] is aware of SOPs for the decontamination of Class II and Class III biosafety cabinets. Decontamination is performed using paraformaldehyde. [REDACTED]

[REDACTED] has never entered a virology hot suite. All hot suite personnel were involved in autoclaving biological waste material. Waste material was bagged and autoclaved. Containers can be decontaminated by fifteen minutes of ultraviolet light in the "pass-through" boxes. Equipment is decontaminated in the airlocks.

[REDACTED] has never been on the hot side of Building [REDACTED]

[REDACTED]

[REDACTED] work is recorded in lab notebooks located in [REDACTED] office. [REDACTED] is not aware of any unofficial or unrecorded work with *Bacillus anthracis* or its simulants.

279A-WF-222936-POI

Continuation of FD-302 of [REDACTED], On [REDACTED], Page 6

[REDACTED] has never used pre-stamped envelopes and has never observed one at USAMRIID. [REDACTED] has observed plastic containers in animal rooms. [REDACTED] does not recall the manufacturer or the exact size of the containers. [REDACTED] used [REDACTED] hands to indicate that the containers approximated a measurement of approximately 10 inches x 18 inches x 6 inches.

b6
b7c

[REDACTED] is the only person whom [REDACTED] is aware of that has the skill to weaponize *Bacillus anthracis*.

[REDACTED] has never hosted a foreign scientist or escorted a foreign scientist in the hot suites. [REDACTED] has never observed unauthorized personnel in the hot suites. [REDACTED] is not a member of the [REDACTED]

The following investigation was conducted by SA [redacted] on
Thursday, April 20, 2006:

The AMERITHRAX Task Force maintains a master list of all persons of interest (POI) who have either been investigated or are currently being investigated for their possible connection to the anthrax mailings in 2001. The list is maintained on the AMERITHRAX shared network drive and is now being placed into Automated Case System (ACS) via this document. This will enable the list to be electronically searched in ACS. The list was last updated on October 25, 2005. The list is represented in its entirety below:

Case ID #: 279A-WF-222936-POI (Pending); 1477-

Title: AMERITHRAX;
Major Case # 184

Synopsis: Documentation of recent actions of the National Center for the Analysis of Violent Crime (NCAVC)/Behavioral Analysis Unit-3 (BAU-3) in furtherance of the captioned investigation.

Reference: 279A-WF-222936-POI Serial 1455

Details: The lead set in the referenced serial requested NCAVC/BAU-3 assistance in reviewing a series of email messages between Bruce E. Ivins, [REDACTED]

[REDACTED] These "personal" email communications were dated from 1999 through 2003 with the majority of these messages involving Ivins [REDACTED]. It was noted that Ivins, [REDACTED]

[REDACTED] had initially become acquainted while employed in a Government laboratory at the United States Army Medical Research Institute of Infectious Diseases (USAMRIID) at Fort Detrick in Frederick, MD.

In furtherance of the aforementioned request, members of the NCAVC/BAU-3, primarily SSA [REDACTED] and [REDACTED] systematically conducted a comprehensive review of the five (5) volumes of email messages. The major focus of this analysis was to attempt to determine if

Re: 279A-WF-222936-POI, 08/01/2005

enough information was available to make an objective assessment of Bruce Ivins from a personality perspective.

Once it was determined that the communications did contain adequate relevant indicators of Ivins' behavioral composite, a more definitive Personality Assessment of Bruce Ivins was pursued. Apparent components of Ivins' personality were noted which led to the development of a specific interview strategy concerning Bruce Ivins for possible future contacts by AMERITHRAX personnel.

During the above-described review, the specific messages deemed pertinent were marked for additional consideration. Once this initial review was completed, the previously-mentioned email communications were subjected to additional evaluation in an attempt to gauge the "normal" personality qualities of Bruce Ivins.

Based on this review of email communications, the NCAVC/BAU-3 offers the following:

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 10/19/2005

[redacted] date of birth [redacted] and
social security number [redacted] was interviewed on [redacted]
[redacted] at [redacted] place of employment, the United States Army Medical
Institute of Infectious Diseases (USAMRIID), Building [redacted] Fort
Detrick, Maryland, work telephone number [redacted] has
been employed at USAMRIID from [redacted] works as the [redacted]

b6
b7C

After being advised of the identities of the interviewing agents
and the purpose of the interview, [redacted] provided the following
information:

[redacted] was shown schematic drawings of building [redacted] and
building [redacted] was asked specifically if [redacted] recalled Bacillus
anthracis "Ames" was stored in these buildings. [redacted] stated since
2001 [redacted] is not aware of Ames stocks being stored in [redacted] only
[redacted] does not have information about room
[redacted] or the first floor hallways in building [redacted]

Regarding the second floor in building [redacted]
[redacted] recalled that [redacted] uses room [redacted]
[redacted] stated [redacted] lab is in room [redacted] could not provide
information about suite [redacted] When asked about the types
of items [redacted] saw in the room [redacted] did recall
having seen [redacted] but could not remember specifics about
[redacted]

[redacted]

[redacted]

[redacted] Specific people [redacted] remembered seeing in

[REDACTED] worked primarily in Suite [REDACTED] of Building [REDACTED]. Suite [REDACTED] Fermenters have been located, at one time or another, in Rooms [REDACTED]. Room [REDACTED] was a culture preparation room and [REDACTED] was a cold storage room. [REDACTED] media was located in Room [REDACTED]. Room [REDACTED] was cluttered with flasks and plates containing prepared media, reagents and bacterial stocks. Spore solutions of anthrax strains was stored in flasks in the cold storage room. [REDACTED]

b7E
b6
b7C

[REDACTED] Rooms in the [REDACTED] Suites are not locked and this material was accessible to anyone that had access to the [REDACTED] Suites. [REDACTED] denies using a fermenter to grow stocks of virulent *Bacillus anthracis*.

[REDACTED] has only worked with virulent *Bacillus anthracis* on one occasion. [REDACTED]

[REDACTED] Ames strain *Bacillus anthracis* that was provided by Bruce Ivins. The challenge occurred Room [REDACTED] of Suite [REDACTED] was given a 15 milliliter conical tube containing one milliliter of a 3×10^9 spores/milliliter concentration of anthrax spores. [REDACTED] plated varying spore concentrations to establish an [REDACTED] determination for the Ames strain *B. anthracis*. [REDACTED]

b6
b7C

[REDACTED] The experiment concluded approximately [REDACTED] autoclaved the solutions of virulent Ames strain *B. anthracis* associated with this project in [REDACTED] received another sample of virulent Ames strain *B. anthracis* from Bruce Ivins. [REDACTED] does not recall the exact date but does recall signing for this stock [REDACTED] received from Ivins. [REDACTED]

[REDACTED] was not required to sign for virulent stock in [REDACTED]

[REDACTED] did not distribute Ames strain virulent *B. anthracis* to anyone.

[REDACTED] has never used a lyophilizer. [REDACTED] used a bench top Speedvac to dry small quantities of *B. anthracis* for weighing. The Speedvac is located in Suite [REDACTED] is not aware of any work at USAMRIID using dry, powdered *B. anthracis*. The use of dry, powdered biological agents is restricted at USAMRIID.

[REDACTED] has never been on the hot side of Building [REDACTED] at USAMRIID. [REDACTED]

[REDACTED]

b6
b7C

During [REDACTED] said [REDACTED] "rarely" visited the hot suites in Buildings [REDACTED] and [REDACTED] and did not enter any [REDACTED] suites during [REDACTED]. Moreover, key card access records for [REDACTED] between [REDACTED] when [REDACTED] returned to USAMRIID, and [REDACTED] do not show [REDACTED] entering the hot suites. During that time, [REDACTED] duties were mostly [REDACTED]

b6
b7C

[REDACTED] said [REDACTED] had never seen nor purchased pre-stamped envelopes similar to the ones used in the mailings. [REDACTED] said [REDACTED] had never used a Virtis lyophilizer, nor could [REDACTED] even recognize one. [REDACTED] is not aware of how Ba is shared between the laboratories. [REDACTED] has no known access to hot suites at any other facility.

[REDACTED] believes that Bruce Ivins, [REDACTED] and [REDACTED] work with Ba at USAMRIID. [REDACTED] identified [REDACTED] as a former Senior Scientist at USAMRIID who has experience in weaponizing Ba. [REDACTED] was at USAMRIID during the biological offensive program and has since retired.

b6
b7C

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 05/26/2006

[redacted]
[redacted] said [redacted] never talked about Ba with anyone. Regarding dispersing a bioweapon on Capitol Hill, [redacted] would not choose anthrax, since [redacted] has never worked with it. Given [redacted] background, [redacted] said [redacted] would be better able to speculate about [redacted]

b6
b7c

[redacted] advised that [redacted] knows of no persons whom [redacted] believes could be associated with the anthrax mailings. During an interview with FBI Special Agents (SAs) in [redacted] indicated that [redacted] does know of one individual who appeared interested in gaining access to a biological agent. [redacted] initially identified this individual by the last name only of [redacted] explained that [redacted]

[redacted] advised that [redacted] possessed an extraordinary interest in accessing viral agents. According to [redacted] some USAMRIID employees became uncomfortable with [redacted] interests. During future interviews with SAs, [redacted] recanted making the above statement pertaining to [redacted] and declared that [redacted] had never met [redacted] explained that [redacted] was not at USAMRIID when [redacted] was employed there.

[redacted] is unaware of any current or former USAMRIID employee who has worked with Ba in a powder or dry form. [redacted] believes that Dugway may have sent a powder or dry form of Ba to USAMRIID for research. [redacted] explained that Dugway had a motive to produce weaponized Ba based on its ongoing research pertaining to Ba detection instruments.

[redacted] financial records for 2001 were unremarkable and revealed no connections to New Jersey. Three calls were placed from [redacted] USAMRIID telephone to [redacted]

[redacted] on September 13, 2001.

This company [redacted]

[redacted] No New Jersey telephone calls were made from [redacted] home. [redacted] advised that [redacted] has no personal or professional associations to New Jersey. [redacted]

A time line of [redacted] activities for the likely time periods of the mailing of the anthrax letters from [redacted]

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 05/26/2006

Princeton, New Jersey, was compiled using USAMRIID security key card access records, telephone call records, credit card use records and statements made by [redacted]. The time-line focused on any six-hour period for which [redacted] would be unaccounted, with the premise that it takes six hours to drive round trip from Frederick, Maryland, to Princeton, New Jersey.

Time-line First Mailing (5:00 p.m., 9/17/01 through 12:00 p.m., 9/18/01)

[redacted] USAMRIID key card access records show a beginning entry at [redacted]. The last record of key card access on [redacted] shows [redacted] exiting at [redacted]. The longest time period without key card activity is approximately 2 hours, 51 minutes. At 11:48 a.m., a Sprint long-distance call was placed to [redacted]. At 5:23 p.m., a Sprint long-distance call was placed to [redacted]. Since [redacted] it is unclear which individual placed the calls.

[redacted] key card access records show a beginning entry at [redacted] and a final exit at [redacted]. The longest time period without key card activity is approximately 54 minutes. Three Sprint long-distance calls were placed to [redacted] at 3:55 p.m., 4:06 p.m., and 4:09 p.m., respectively.

b6
b7c

Time-line Second Mailing (3:00 p.m., 10/06/01 through 12:00 p.m., 10/09/01)

[redacted] key card access records show a beginning entry at [redacted] and a final exit at [redacted]. The longest time period without key card activity was approximately 52 minutes. A \$100 cash withdrawal was made from a [redacted] bank account in Frederick, Maryland, although the time of this withdrawal is unknown. In addition, [redacted] a Sprint long-distance call was placed to [redacted] from [redacted] home phone.

[redacted]
[redacted] A Sprint long-distance call was placed at 4:20 p.m. to [redacted] at 7:17 p.m. to [redacted] and at 8:53 p.m. to [redacted]

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 05/26/2006

[redacted] At 6:31 p.m., a Sprint long-distance call was placed to [redacted]

b6
b7C

[redacted] key card access records show a beginning entry at [redacted] and a final exit at [redacted]. The longest time period without key card activity was approximately 4 hours, 49 minutes. At 1:12 p.m., a Sprint long-distance call was placed to [redacted] at 4:53 p.m. to [redacted] at 6:22 p.m. to [redacted] at 7:27 p.m. to [redacted] and at 7:33 p.m. to [redacted]

[redacted] did not engage in any official travel during the time period of the mailings. [redacted]

[redacted] A NCIC check for [redacted] was negative.

b6
b7C
b7E

[redacted] cooperated with this investigation. No evidence has been discovered to date which suggests that [redacted] may have been involved in the anthrax-laced letter mailings. Unless or until such evidence is identified, no further investigation of [redacted] is intended in this case.

1

The following investigation was conducted by Special Agent (SA) [redacted] of the Federal Bureau of Investigation (FBI) on March 08, 2005:

b6
b7C

Available telephone records for Bruce E. Ivins, address: [redacted] telephone #: [redacted] were examined for the month of February 2005.

A total of fifty-five unique telephone numbers were identified from incoming and outgoing telephone calls (Attached).

b7E

Available telephone records for Bruce E. Ivins for the month of February 2005 were thoroughly examined for the known telephone numbers of: [redacted]

b7E
b6
b7C

(WFO Note: Attached are the results of [redacted] for [redacted] which indicate the above captioned home telephone.)

A query of an internet telephone directory identified these fifty-five unique telephone numbers as being located in the following locations: Maryland; Chambersburg, Pennsylvania; Johnstown, Pennsylvania; York, Pennsylvania, Washington, D.C.; Martinsburg, West Virginia; and Parkersburg, West Virginia.

b6
b7C

A query of [redacted] database reverse directory index indicated no records found for forty-eight of the fifty unique telephone numbers.

Through investigation the following three residential telephone listings are identified, via [redacted] records (Attached), as:

[redacted]

[redacted]

~~TELEPHONE~~ #:
~~ADDRESS~~:
~~RESIDENTS~~:

A rectangular box used for redaction, likely containing sensitive information.

~~TELEPHONE~~ #:
~~ADDRESS~~:
~~RESIDENTS~~:

A rectangular box used for redaction, likely containing sensitive information.

No derogatory information was developed on the above captioned individuals or addresses.

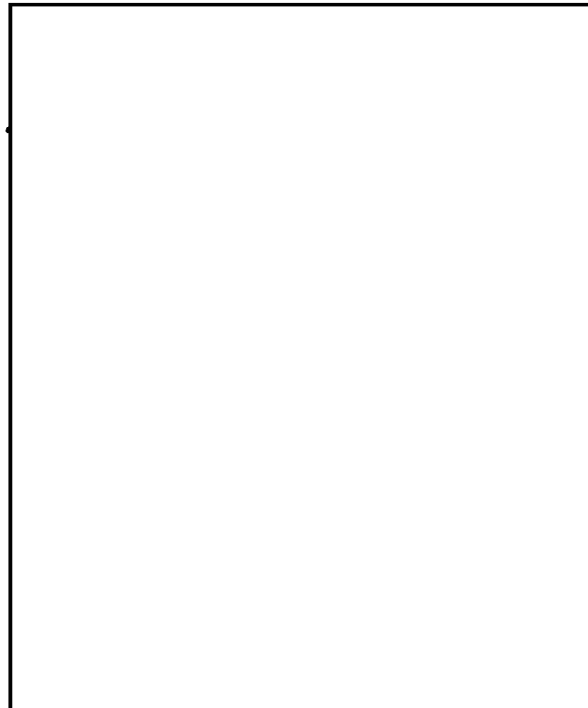

Through investigation the following four business telephone listings are identified, via  records (Attached), as:

~~TELEPHONE~~ #:
~~BUSINESS~~:
~~ADDRESS~~:

~~TELEPHONE~~ #:
~~BUSINESS~~:
~~ADDRESS~~:

~~TELEPHONE~~ #:
~~BUSINESS~~:
~~ADDRESS~~:

~~TELEPHONE~~ #:
~~BUSINESS~~:
~~ADDRESS~~:

A large rectangular box used for redaction, covering a significant portion of the lower half of the page.

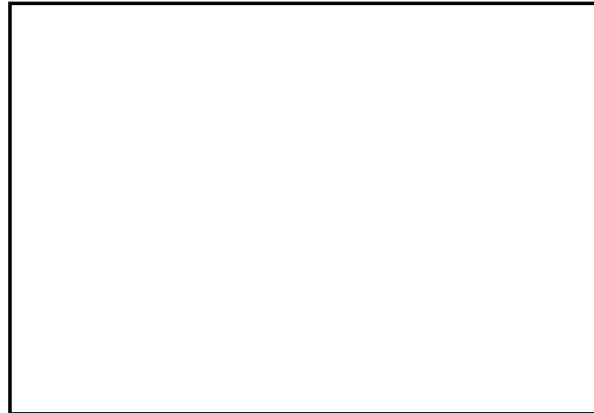

No derogatory information was developed on the above captioned businesses or addresses.

Through investigation  is further described as:

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 04/01/2005

The following investigation was conducted on March 31, 2005 by SA [redacted] and SA [redacted] b6 b7C

A consensual search was conducted on March 31, 2005 of the workstation utilized by BRUCE IVINS and any network storage location where data may be stored at his place of employment. IVINS is employed at the United States Army Medical Research Institute of Infectious Diseases (USAMRIID), Fort Detrick, Frederick, Maryland. The office space utilized by the noted individual is Room 19 located within Building 1425 at USAMRIID.

SA [redacted] copied the contents of IVINS's H: drive onto a writeable CD-ROM disk. IVINS's H: drive is mapped to the folder IvinsBE\$ on the server arfshefl02.

IVINS provided the agents with the following documents:

- Reference Material Receipt Record for USAMRIID Part No 102
- Spreadsheet with inventory information for Ames spores
- Email from IVINS to [redacted] regarding Ames strain information
- Grand Jury subpoena USAO# [redacted] sent to the attention of [redacted]

b3
b6
b7C

[redacted] requesting [redacted]

- Memorandum from [redacted] dated February 5, 2002 regarding the response to subpoena USAO [redacted]

IVINS provided these documents in regards to an interview earlier in the day on March 31, 2005.

A copy of the FD-26 Consent to Search forms, the FD-597 for items collected, and documents provided by IVINS will be maintained in the 1A section of the file.

common practice for Primary Investigators Bruce Ivins [redacted]
[redacted] to inform the testing individuals of sample strain
types.

b6
b7C

[redacted]

[redacted] advised that [redacted]
[redacted] did not travel to New Jersey
in September or October of 2001. [redacted] does not know
[redacted]

A time line of [redacted] activities for the likely
time periods of the mailing of the anthrax letters from
Princeton, New Jersey was compiled using USAMRIID security key
card access records, telephone call records, credit card use
records and statements made by [redacted]. The time-line
focused on any six-hour period for which [redacted] would be
unaccounted, with the premise that it takes six hours to drive
round trip from Frederick, Maryland to Princeton, New Jersey.

Time-line First Mailing (5:00 p.m., 9/17/01 through
12:00 noon, 9/18/01)

[redacted] key card access records show [redacted]
entering building [redacted] and leaving building [redacted]
[redacted]. The longest time period without key card
activity is approximately one hour and forty-six minutes.

b6
b7C

The first key card record for [redacted]
is at [redacted] and the last is at [redacted]. The longest
period without key card activity on the 18th is approximately
one hour and forty-two minutes.

b6
b7C

Time-line Second Mailing (3:00 p.m., 10/06/01
through 12:00 noon, 10/09/01)

There are no key card access records for [redacted]
on [redacted]

On [redacted] entered building [redacted]
[redacted] and badges for the final time at [redacted]. The longest
period without key card activity is approximately three hours
and fifteen minutes.

No records have been identified to show [redacted]
whereabouts during the evening hours of the above-mentioned
dates.

b7E

[redacted]

States Postal Inspection Service with negative results.

In addition to the findings presented above and the fact that [redacted] has cooperated with this investigation, no evidence has been discovered to date which suggests that [redacted] may have been involved in the anthrax-laced letter mailings. Unless or until such evidence is identified, no further investigation of [redacted] is intended in this case.

Time-lines of [redacted] activities for the likely mailing
periods of the anthrax-laced letters from Princeton, New Jersey
were compiled using USAMRIID keycard access records:

Time-Line for the First Mailing

(5:00 p.m., 9/17/01 through 12:00 p.m., 9/18/01)

The following USAMRIID keycard access records exist for
the relevant time period:

Potential mailing period begins

Potential mailing period ends

According to the above data, [redacted] worked from at least
[redacted] is unaccounted for
between [redacted] a period
of 11 hours and 48 minutes.

Time-Line for the Second Mailing

(3:00 p.m., 10/6/01 through 12:00 p.m., 10/9/01)

To: Washington Field From: Washington Field
Re: 279A-WF-222936-POI, 09/25/2006

Following are USAMRIID keycard access records that serve as beginning and ending times of [] work shifts, for the purposes of this time-line. Within these shifts exist many keycard swipes, where no two consecutive swipes are more than 2 hours and 30 minutes apart. It is assumed that since there are approximately 200 miles between USAMRIID and Princeton, New Jersey, it would have been impossible to travel the 400 mile round trip during any of the below work shifts.

b6
b7C
b7E

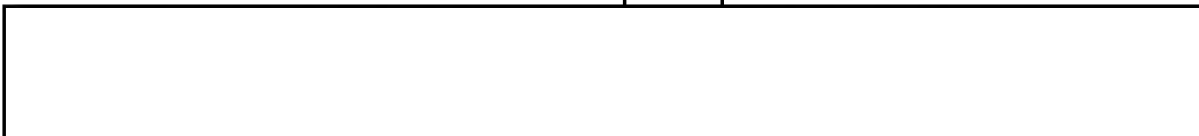

Potential mailing period begins

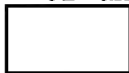

Potential mailing period ends

According to the above data, assuming [] is accounted for during each of the work shifts, [] is unaccounted for during the following times: 16 hours and 31 minutes between [] 17 hours and 27 minutes between [] and 18 hours and 8 minutes between []

A review of an Equifax report for [] revealed no derogatory information. Checks of NCIC and [] Motor Vehicle Administration records for [] were unremarkable.

In addition to the findings presented above and the fact that [] has been cooperative in this investigation, no evidence has been discovered to date which suggests that [] may have been involved in the anthrax-laced letter mailings. Unless or until such evidence is identified, no further investigation of [] is intended in this case.
